# Automated Order Routing to Increase Efficiency for Outsourced Jobs

**VisionWeb O.N.E. (Open Network Exchange) facilitates electronic data transfer between laboratory management systems, which in turn allows labs to connect electronically to one another for seamless ordering.**

Electronic data transfer occurs when order data is received by VisionWeb O.N.E. from the sending lab, translated into various formats, and sent on to the receiving lab, without manual intervention.

VisionWeb O.N.E. is a powerful transmission and translation tool that allows orders to be submitted to an originating lab, outsourced for fulfillment to a secondary lab or processing center, and returned to the originating lab much faster and with fewer errors than with conventional methods.

VisionWeb O.N.E. allows labs to outsource jobs that cannot be produced in-house for various reasons, including:

- Proprietary products and materials
- Special treatments and coatings
- Overflow work during busy times
- Disaster recovery to eliminate service interruptions

**Connect electronically for seamless ordering**

## Benefits of Seamless Order Routing

Using VisionWeb O.N.E. for seamless order routing has many benefits, including:

- Reduced errors and rework as a result of outsourcing without manual intervention
- Improved turnaround time since data/order transfer happens instantly
- Ensured business contingency when capacity limitations or disasters occur
- Ability to expand product/service offering beyond in-house capabilities
- No charge to the sending laboratory for outsourcing orders

## Technical Specifications & Connectivity

VisionWeb O.N.E. is compatible with all laboratory management systems in the VisionWeb network. Labs using these laboratory management systems can send and receive orders using VisionWeb O.N.E.:

- CC Systems
- DVI
- OMICS
- Optifacts
- Optivision
- VisionStar
